# Tasmania fuel supply update

## Current situation

27 November 2026

**Fuel Stock Levels** as of 24 November 2026*

Petrol **067** Days

Diesel **48** Days

*Fuel stock levels include stock in terminals and stock in transit.

Tasmania's fuel supply **remains secure** and we continue to receive regular fuel deliveries as normal through national and international supply chains.

All five of Tasmania's fuel terminals are stocked, with over 99% of fuel outlets also being fully stocked.

Tasmania remains aligned with the National Fuel Security Plan at Level 2 – Keeping Australia Moving.

The Tasmanian Government is keeping a close eye on fuel supplies and the ships bringing fuel into the state, and is working with the Australian Government and suppliers.

Tasmanians should continue to **purchase fuel as normal**, use FuelCheck TAS to check local availability, pricing and outages.

## Taking action

Free bus and ferry travel will continue until 30 June 2027 to help reduce living costs.

Fuel laws were introduced to **improve transparency**, compliance and emergency response powers.

Consumer, Building and Occupational Services (CBOS) is actively **monitoring** fuel pricing compliance.

## National fuel security plan

1 **2** 3 4

### Level 2 - Keeping Australia Moving

The Australian Government is taking precautionary actions to support fuel supply. Continue to only buy the fuel you need and consider ways to reduce fuel use.
