

# Tasmania fuel supply update

## Current situation

17 April 2026

Fuel Stock Levels  
as of 14 April 2026\*

Petrol

100 Days

Diesel

58 Days

\*Fuel stock levels include stock in terminals and stock in transit.

Tasmania's fuel supply **remains secure** and we continue to receive regular fuel deliveries as normal through the national supply chain.

All five of Tasmania's fuel terminals are stocked.

The Tasmanian Government is keeping a close eye on fuel supplies and the ships bringing fuel into the state, and is working with the Australian Government and suppliers.

Tasmanians should continue to **purchase fuel as normal**, use FuelCheck TAS to find the best price near you.

## Taking action

Free bus and ferry travel will continue until July 1 2026 to help reduce living costs.

New fuel laws have been introduced to **improve transparency**, compliance and emergency response powers.

The Tasmanian Government worked with the Australian Government to **halve fuel excise**, helping to ease cost pressures for households and businesses.

Consumer, Building and Occupational Services (CBOS) is actively **monitoring** fuel pricing compliance.

Additional one-off funding was delivered to assist food relief services across Tasmania.

## National fuel security plan

### Level 2 - Keeping Australia Moving

The Australian Government is taking precautionary actions to support fuel supply. Only buy the fuel you need and consider ways to reduce fuel use.
