Tasmania fuel supply update

Current situation

2 October 2026

Fuel Stock Levels as of 29 September 2026*

Petrol **065** Days

Diesel **51** Days

*Fuel stock levels include stock in terminals and stock in transit.

Tasmania's fuel supply **remains secure** and we continue to receive regular fuel deliveries as normal through national and international supply chains.

All five of Tasmania's fuel terminals are stocked, with over 98% of fuel outlets also being fully stocked.

Tasmania remains aligned with the National Fuel Security Plan at Level 2 – Keeping Australia Moving.

The Tasmanian Government is keeping a close eye on fuel supplies and the ships bringing fuel into the state, and is working with the Australian Government and suppliers.

Tasmanians should continue to **purchase fuel as normal**, use FuelCheck TAS to check local availability, pricing and outages.

Taking action

Free bus and ferry travel will continue until 30 June 2027 to help reduce living costs.

Fuel laws were introduced to **improve transparency**, compliance and emergency response powers.

Consumer, Building and Occupational Services (CBOS) is actively **monitoring** fuel pricing compliance.

National fuel security plan

1 **2** 3 4

Level 2 - Keeping Australia Moving

The Australian Government is taking precautionary actions to support fuel supply. Continue to only buy the fuel you need and consider ways to reduce fuel use.
